

H₂O Guard™ - C1000-GAC/KDF CHLORAMINE REMOVAL Counter Top Water Filtration System

H₂O Guard™ Water Filtration Systems

are high performance water filtration systems designed to substantially improve the quality of your drinking water. They provide great tasting water while producing water that is cleaner, healthier and safer. We strive to provide top quality products and understand that transforming your water from questionable to premiere quality is really not a matter of chance, it's simply a matter of choice.

H₂O Guard™ Water Filtration Systems

are designed to address a broad range of issues relating to your drinking water like taste, odor, chloramine, chlorine and most importantly, items of health concern that are paramount to your family's health and wellbeing.

The H₂O Guard™ C1000-GAC/KDF incorporates a multi-stage water filtration cartridge designed to provide you with 800 gallons of premium quality drinking water with minimal service or maintenance. H₂O Guard has combined and enhanced proven filtration technologies to provide you with a product that will give you water that not only tastes great but also addresses contaminants of health concern.

Filtration Process –

The H₂O GAC/KDF 85 filter uses an advanced proprietary replaceable cartridge with a granular catalytic coconut shell carbon (GCAC) and KDF 85 process media to remove chloramine, chlorine, organic volatile compounds (VOC) and other contaminants responsible for taste, appearance and odor that may be present in municipally supplied water.

H₂O Guard™ - C1000-GAC/KDF CHLORAMINE REMOVAL

Counter Top Water Filtration System

H₂O Guard™ Cartridge Replacement Indicator (CRI)

is another way H₂O Guard™ measures time and informs you when it's time to change your filter. This is an added convenience which takes away the guess work and helps ensure your drinking water system is working at optimal performance. Two LED lights update you on the systems operation. The YELLOW LED indicates less than 10% of filter capacity remains (*it's time to order a replacement cartridge*), and the RED LED indicates the filter capacity has been reached, and it's time to install new cartridge. Peace of mind made easy!

PRODUCT BENEFITS

- ✓ 5µ Filtration
- ✓ Superior Taste and Odor
- ✓ Chloramine and Chlorine Reduction
- ✓ Lead and VOC Reduction
- ✓ 800 Gallon Capacity
- ✓ Cartridge Replacement Indicator (CRI)
- ✓ Carbon Block Certified by NSF®
- ✓ Quick & Easy Install
- ✓ Reduces most EPA-listed contaminants

PRODUCT SPECIFICATIONS

Rated Capacity:	800 gallons (3028 L)
Micron Rating:	5 µ
Replacement Filter:	H2OG-GACKDF
Flow Rate:	0.75g/m (2.84 LPM) at 60psi
Maximum Working Pressure:	100 psig (689.5 kPa)
Minimum Working Pressure:	30 psig (206.8 kPa)

Maximum Operating Temperature: 100 °F (38 °C)

Minimum Operating Temperature: 34 °F (1 °C)

COLORS AVAILABLE

NOTICE: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

* NSF Standard 53 Certification Pending.

** This water filtration device has not finalized certification with NSF International and has not been approved by the California Water Resource Control Board, therefore, it is not available for sale in the State of California for the contaminant reduction claims listed.
